| 9:30 – 10:30  | Mass Timber in Maine and Beyond: Products, Projects and the Case for Local Timber  
    *Ricky McLain and Marc Rivard, WoodWorks* |
| 10:30 – 10:45 | Break                                                                |
    *Alan Organschi, Gray Organschi Architecture (GOA) & Yale School of Architecture* |
| **Lunch**     |                                                                     |
| 11:45 – 1:00  | Lunch Slideshow: Maine Mass Timber Design Competition  
    *Ryan Kanteres, Scott Simons Architects* |
| **Afternoon Session:** |                                                           |
| 1:00 – 1:45   | **Track 1 (Supply Side): Room #1**  
    *SmartLam Maine*  
    *Casey Malmquist, SmartLam* |
| 1:45 – 2:30   | **Track 2 (Demand Side): Room #2**  
    *Increasing Demand for Mass Timber*  
    *Matt Tonello, Consigl (moderator)*  
    *Paul Becker, Becker Structural Engineers*  
    *Chris Carbone, Bensonwood*  
    *Rob Dodd, Nabholz Construction*  
    *Mass Timber Construction with Glulam*  
    *Liz Connor, Unalam* |
| 2:30 – 2:45   | **Track 1 (Supply Side): Room #1**  
    *UMass Olver Design Bldg: From Concept to Occupancy*  
    *Tom Chung, Leers Weinzapfel Associates*  
    *Peggi L. Clouston, UMass* |
| 2:45 – 3:30   | **Track 2 (Demand Side): Room #2**  
    *UMass Olver Design Bldg: From Concept to Occupancy*  
    *Tom Chung, Leers Weinzapfel Associates*  
    *Peggi L. Clouston, UMass*  
    *Maine’s Resources Part 1 (The Forest)*  
    *Alden Robbins, Robbins Lumber (moderator)*  
    *Jason Brochu, Pleasant River Lumber*  
    *Jerome Pelletier, J.D. Irving*  
    *Ken Laustsen, Maine Forest Service (Ret.)*  
    *Jeff Easterling, NELMA*  
    *Patrick Strauch, Maine Forest Products Council* |
| 3:30 – 4:15   | **Track 1 (Supply Side): Room #1**  
    *UMass Olver Design Bldg: From Concept to Occupancy*  
    *Tom Chung, Leers Weinzapfel Associates*  
    *Peggi L. Clouston, UMass*  
    *Maine’s Resources Part 2 (The Workforce)*  
    *Ryan Wallace, MCBER-USM*  
    *Mindy Crandall, UMaine* |
| 4:15 – 5:00   | **Closing Session:**  
    *Closing Discussion “Seizing the Opportunity” Moderated by UMaine & WoodWorks: Room #1* |
| 5:15 – 6:00   | Advanced Structures and Composites Center Tour: UMaine Campus      |

### About the Host Organizations:

**About the MMTCC:**  
Formed in 2017 through EDA funding, the Maine Mass Timber Commercialization Center (MMTCC) at the University of Maine serves to increase informed awareness of mass timber construction practices in New England through collaboration with industrial partners, trade organizations, construction firms, architects, and other groups while promoting Maine as an ideal location for mass timber manufacturing facilities.

**About WoodWorks:**  
WoodWorks – Wood Products Council provides free nationwide project assistance, education, and resources related to the code-compliant design, engineering and construction of commercial and multi-family wood buildings. Our experts support projects (design through construction) on a wide range of building types, including multi-family/mixed-use, education, office, commercial, industrial, civic/recreational and institutional/healthcare.
Many are predicting the coming of a Timber Age, where Northern forests and rural economies supply the growing demand for urban construction and housing. In the Northeast, Maine and its forests sit atop one of the largest urban population centers on the planet. With over 90% of its land base covered in trees, Maine is the most heavily forested state in the nation, making it a prime candidate for economic revitalization through the sustainable production of mass timber.

Hosted by the Maine Mass Timber Commercialization Center (MMTCC) in partnership with WoodWorks, this conference is part of an initiative to invigorate the region’s forest-based economy by bringing innovative mass timber manufacturing and projects to the State of Maine. A number of topics will be explored, including both supply-side (manufacturing, utilization of locally-sourced raw materials, workforce needs) and demand-side issues (design and construction of products and structures, code applications, fire resistance, and developer obstacles). By presenting a dynamic mix of speakers, including CLT companies that have announced plans to manufacture in Maine as well as architects and engineers, this event will bring together regional stakeholders to address questions that commonly arise when discussing this exciting new (to the U.S.) construction type.

Attendees will qualify for 6 AIA/CES HSW LUs, 6 PDH credits, 0.6 ICC credits or 6.5 SAF CFE credits.
