

WORKFORCE DEVELOPMENT

Integrated training solution to providing the technical workforce and innovations critical to moving the nation's economy forward

DELIVERING SOLUTIONS FOR CRITICAL AND EMERGING NEEDS

As the global economy is transitioning into an interconnected, digital age, requiring thousands of skilled workers in advanced manufacturing, artificial intelligence, and defense technologies. ASCC is meeting this challenge by offering:

Workforce-Ready Training:

Immersive programs in robotics, Al-driven manufacturing, and composites innovation tailored to meet industry needs.

Collaborative Pathways:

Connecting K-12 pipelines, community colleges, and UMaine System universities to ensure seamless transitions into high-impact careers.

Graduate Excellence:

Expanding graduate-level opportunities to foster a deeper pool of talent in engineering and computing.

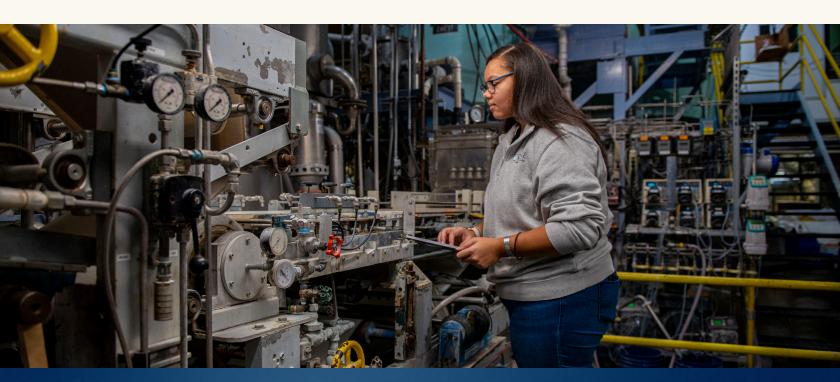

TRAINING THE WORKFORCE OF THE FUTURE

Al Intergration Advanced Manufacturing Experience

Microcredentialling Composites Innovation

Digital Fabrication Robust Industry Network

Immersive Teaching Model Hands on Training

Advanced Structures & Composites Center
